

## **J. Thomas McClintock, Ph.D.**

### **Education**

B.S. - Department of Biology, James Madison University, Harrisonburg, VA, 1976.

M.S. - Department of Entomology, University of Maryland, College Park, MD, 1980.

Ph.D. - Department of Microbiology, University of Maryland, College Park, MD, 1985.

Postdoctoral Fellow - Plant Protection Institute, U.S.D.A., Beltsville, MD, 1987.

### **Employment**

1. Founder/Consultant - **DNA Diagnostics**, Inc., P.O. Box 1144, Dunkirk, MD. February, 1993-Present.
2. Division Director - U.S. Environmental Protection Agency, Washington, DC. November, 2000-Present.
3. Associate Division Director (Acting) - U.S. Environmental Protection Agency, Washington, DC. October, 1999-June, 2000.
4. Branch Chief - U.S. Environmental Protection Agency, Washington, DC. February, 1997-November, 2000.
5. Team Leader/Microbiologist - U.S. Environmental Protection Agency, Washington, DC. August, 1989-February, 1997.
6. Legislative Assistant/Science Advisor - U.S. House of Representatives, Committee on Agriculture, Washington, DC. January, 1994-June, 1995.
7. Group Leader/Senior Staff Scientist - Digene Diagnostics, Inc., Silver Spring, MD. January, 1988-August, 1989.
8. Postdoctoral Fellow - U.S. Department of Agriculture, Agricultural Research Service, Beltsville, MD. January, 1985-December, 1987.
9. Research Assistant - The Johns Hopkins University School of Medicine, Department of Pharmacology and Experimental Therapeutics, Baltimore, MD. September, 1980-September, 1981.
10. Graduate Research Assistant - University of Maryland, Department of Entomology, College Park, MD. August, 1977-August, 1980.

### **Academic Appointments**

1. Professor - George Mason University, Department of Molecular and Microbiology, Fairfax, VA. January, 1999-Present. Teach undergraduate courses in Microbiology, Genetics, and graduate courses in Forensic DNA Analysis and Forensic Sciences.
2. Assistant Professor - Northern Virginia Community College, Science and Applied Technologies Division, Alexandria, VA. August, 1996-December, 1997. Taught introductory courses in Biology.
3. Assistant Professor - Anne Arundel Community College, Life Sciences Division, Arnold, MD. January, 1994-May, 1996. Taught courses in Microbiology and Biology.
4. Instructor - EXON-INTRON, Inc., York, PA. January, 1996-August, 2001. Responsibilities included teaching lecture and laboratory courses entitled *RFLP*

*Technologies: Forensic and Research Applications, DNA Typing: RFLP and PCR-Based Systems, and PCR Methodology-RFLP/DIS80 Typing.*

5. Assistant Professor - Montgomery College, Department of Science, Mathematics, and Applied Technologies, Germantown, MD. January, 1993-December, 1994. Taught introductory courses in Biology and Genetics.
6. Instructor - University of Maryland Baltimore County, Department of Biological Sciences, Catonsville, MD. September, 1981-September, 1984. Taught an introductory course in Microbiology and an upper level course in Molecular Genetics.
7. Faculty Research Assistant - University of Maryland, Department of Microbiology, College Park, MD. May, 1982-January, 1985.

## Research Experience

1. Group Leader/Senior Staff Scientist - Research involved the development and use of nonradioactive DNA probes for the detection and diagnosis of viral pathogens in clinical samples by *in situ* hybridization. Managerial responsibilities included administrative leadership, technical supervision, planning, developing, prepared and managed budget, administrating research activities, interfacing with all levels of management, and establishing research collaborations. Radiation Safety Officer, Biohazard Safety Officer, Principal Investigator/Project Manager for NIAID-supported SBIR grant, Principal Investigator/Project Director for NEI-supported SBIR grant. Dr. F. E. Taub, Digene Diagnostics, Inc., Silver Spring, MD.
2. Postdoctoral Fellow - Research involved the investigation of molecular events occurring during baculovirus replication in permissive, semipermissive, and nonpermissive cell lines. Additional projects included transcriptional and translational control mechanisms using baculovirus-infected cells as a model system, gene isolation and characterization, cloning, DNA restriction endonuclease mapping using various DNA/DNA hybridization techniques, sequencing, and investigating DNA-protein interactions. Dr. E. M. Dougherty, Insect Biocontrol Laboratory, U.S. Department of Agriculture, Beltsville, MD.
3. Research Assistant - Conducted research on the structure and function of the Epstein-Barr virus genome. Using recombinant DNA technology a genomic library was constructed and used to establish a detailed restriction map for a region encoding the transformation function. Dr. S. D. Hayward, Department of Pharmacology and Experimental Therapeutics, The Johns Hopkins University School of Medicine, Baltimore, MD.
4. Graduate Research Assistant - Conducted research on the selection of a virulent strain of invertebrate viruses using chemical mutagenesis and serial passage. Dr. C. F. Reichelderfer, Department of Entomology, University of Maryland, College Park, MD.

## Consulting Experience

1. Founder of **DNA Diagnostics**, Inc., P.O. Box 1144, Dunkirk, MD 20754. February, 1993-present. A consulting firm specializing in the science, legal, and ethical issues surrounding the use of DNA technology in forensic science. Provide training in the science of DNA, interpretation of criminal and paternity cases where DNA or entomological analyses have been performed, and expert testimony.

2. Media Cybernetics, L.P., Silver Spring, MD 20910. 1995. Provided guidance on the usability of Gel-pro Analyzer,™ a Windows™-based software module which automates the collection and storage of data from electrophoretic gel images for forensic and gene linkage analyses of RFLP, VNTR, and PCR-based assays (HLA DQA1 and STRs).

### **Regulatory Science Experience**

1. Division Director - Provide day-to-day supervision and direction for the implementation and evaluation of all major science and science policy issues relating to hazard assessment and biotechnology. Serves as the principal point of contact and coordination point for interactions within EPA and with other Federal Agencies on biotechnology, and scientific and technical issues. Also responsible for the management, coordination and oversight of planning, implementing and evaluating science and science policy issues and activities relating to biotechnology. Mr. Joseph Merenda, Office of Science Coordination and Policy, U.S. Environmental Protection Agency, Washington, DC.
2. Associate Division Director (Acting) - Provide administrative and program expertise to the Director for all Division activities involving assessing the health and environmental hazards and risks of new and existing chemicals and microorganisms (naturally-occurring and genetically engineered) and preparing integrated hazard and risk assessment documents as needed to support the full range of Office of Pollution Prevention and Toxics' (OPPT) regulatory and non-regulatory programs. Involved in managing various aspects of U.S. participation in the Organization for Economic Cooperation and Development Screening Information Data Sets program in High Production Volume chemicals; reviewing and evaluating health and environment effects test data submitted under specific authorities administered by OPPT, and provided expert scientific support to Agency audits of testing programs producing such data. Responsible for developing and updating health and environmental hazards and risks of chemicals and microorganisms and ensuring that procedures and criteria employed by OPPT are consistent with Agency guidelines and the current scientific state-of-the-art. Provided administrative and procedural expertise for developing Division strategies, defining major program objectives, estimating required resource levels, reviewing and evaluating ongoing program activities and assessing work products. Also involved the Office of Research and Development in defining and reviewing Agency research related to characterizing the health and environmental effects of chemicals and biotechnology-derived products. Dr. Oscar Hernandez, Risk Assessment Division, Office of Pollution Prevention and Toxics, U.S. Environmental Protection Agency, Washington, DC.
3. Branch Chief - Provide supervision, leadership, and administrative direction to staff. Define major program objectives, estimate required resource levels, review and evaluate ongoing program activities and assess outputs produced. Provide support for developing and recommending program objectives and operations. Provide supervision to staff specialists to develop policies and objectives, allocating and managing resources, develop budget strategies and justifications, develop staffing patterns, and resolve operational problems. Also represent the Branch, Division or Office at various task force panel and committee meetings, involving development of management products, outreach, marketing and training activities. Exercise supervisory personnel management responsibilities over Branch members. Drs. Oscar Hernandez and Vanessa Vu, Risk

Assessment Division, Office of Pollution Prevention and Toxics, U.S. Environmental Protection Agency, Washington, DC.

4. Team Leader/Microbiologist - Involved in providing strategies and establishing guidelines for assessing the risks associated with the introduction of transgenic pesticidal plants, biochemical pesticides, or products derived through biotechnology, into the environment. Also involved in the toxicological (both mammalian and ecological) evaluation of data pertaining to microbial and biochemical pest control agents, and in the evaluation of the molecular construction of genetically engineered microbial and transgenic plant pesticides for regulatory compliance under FIFRA/FFDCA/FQPA. Also involved in issues pertaining to international and domestic regulation of agricultural products derived using biotechnology. Additional tasks included the development of data requirements for transgenic plant testing, regulatory reform for biochemical pesticides, strategies for development/resolution of guidelines/policy issues related to products developed through biotechnology, and harmonization of regulatory requirements under the Canadian-United States Trade Agreement, NAFTA, and OECD. Dr. R. D. Sjoblad, Health Effects Division and Dr. J. Andersen, Biopesticides and Pollution Prevention Division, Office of Pesticide Programs, U.S. Environmental Protection Agency, Washington, DC.

### **Invited Presentations**

1. Forensic DNA Analysis. Office of the Federal Public Defender. Alexandria, VA. December, 2011.
2. Forensic DNA Analysis. 2011 19th Annual Virginia Bar Association Capital Defense Workshop. Richmond, VA. November, 2011.
3. Forensic Evidence in Sexual Assault and Other Criminal Cases. 2011 Annual Criminal Law CLE. Fairfax Bar Association, Fairfax, VA. October, 2011.
4. Forensic DNA Analysis of Biological Evidence. Virginia Trial Lawyers Association's 4th Advanced Criminal Law Retreat. Charlottesville, VA. April, 2011.
5. DNA Analysis of Biological Evidence. Alpha Epsilon Delta, National Pre-Medical Honor Society, George Mason University, Fairfax, Va. March, 2010.
6. Managing Potential Risks with Products of Biotechnology. The American Institute for Medical and Biological Engineering, Washington, DC. February, 2010.
7. The ABCs of DNA Paternity Testing. The Tribal Council/Commission of the Little River Band of Ottawa Indians, Manistee, MI. 2006.
8. The Ordeal of Darrell Rice: The Role of DNA. 13th Annual Capital Defense Workshop, Virginia Bar Association, Richmond, VA. November, 2005.
9. DNA Cross-Examination College, Science Faculty. 3rd Annual Forensic Science Conference, the Public Defender Service for the District of Columbia, Washington, DC. September, 2005.
10. The ABCs of Forensic DNA Typing: STRs and Gender ID. Forensic Nursing: Forging Partnerships for the Future, 13th Annual Scientific Assembly of the International Association of Forensic Nurses, Arlington, VA. September, 2005.
11. DNA Typing as a Forensic Tool, Virginia College of Criminal Defense Attorneys and Virginia Public Defender Commission, Four for Forensics, Continuing Legal Education course. University of Richmond, Richmond, VA. July, 2002.

12. The Power of Forensic DNA Typing. The Department of Biology, James Madison University, Harrisonburg, VA. April, 2005.
13. The ABCs of Forensic DNA Typing. Fairfax Bar Association, Fairfax, VA. June, 2003.
14. Understanding Forensic DNA Evidence, Alexandria Bar Association, Continuing Legal Education course, Alexandria, VA. October, 2002.
15. DNA Typing as a Forensic Tool. Virginia College of Criminal Defense Attorneys and Virginia Public Defender Commission, Four for Forensics, Continuing Legal Education course. University of Richmond, Richmond, VA. July, 2002.
16. DNA Typing as a Forensic Tool. Public Defender's Office of the State of Delaware, Continuing Legal Education course. Wilmington, DE. June, 2001.
17. DNA Analysis. District of Columbia Bar Association, The Criminal Law and Individual Rights Section, Washington, DC, May, 2000.
18. The ABCs of DNA Typing: Principles and Methodologies. Office of Pollution Prevention and Toxics, Technical Training Committee, U.S. Environmental Protection Agency, Washington, DC. October, 1998.
19. Applications of DNA Technology in Forensic Science. Law Offices of Keefer, O'Reilly, Ferrario and Lubbers. Las Vegas, NV. August, 1996.
20. The ABCs of DNA: An Introduction to the Science of DNA. State of Maryland, Office of the Public Defender, Annual Conference, Oakland, MD. May, 1996.
21. Advanced Formula DNA: Crime Scene to Lab to Court. State of Maryland, Office of the Public Defender, Annual Conference, Oakland, MD. May, 1996.
22. DNA Technology in Forensic Science: A Prospective from the Defense. DNA 101- Unraveling the Mystery. American Prosecutors Research Institute, Criminal Prosecution Division, Alexandria, VA. November, 1995.
23. Forensic Applications of DNA Technology. DNA Working Group, Office of the Public Defender, State of Maryland, Ellicott City, MD. October, 1993.
24. The Use of DNA Technology in Forensic Science. Office of the Federal Public Defender, Baltimore, MD. April, 1995.
25. Applications of DNA Technology in Forensic Science. DNA Working Group, Office of the Public Defender, State of Maryland, Annapolis, MD. December, 1993.

### **Specialized Training and Workshops**

1. Essential Aspects of Forensic DNA Testing. National Institute of Justice/Forensic Training Network. Online Training. 2011.
2. Principles and Thought Processes of Crime Scene Investigation. National Institute of Justice/Forensic Training Network. Online Training. 2011.
3. The Body as a Crime Scene: Forensics and Cold Case Investigations. George Mason University, Fairfax, VA. 2011.
4. Forensic DNA for Officers of the Court. National Forensic Science Technology Center/Department of Justice. Online Training. 2007.
5. Amplified DNA Product Separation for Forensic Analysts. National Forensic Science Technology Center/Department of Justice. Online Training. 2007.
6. STR Data Analysis and Interpretation for Forensic Analysts. National Forensic Science Technology Center/Department of Justice. Online Training. 2007.

7. DNA Amplification for Forensic Analysts. National Forensic Science Technology Center/Department of Justice. Online Training. 2007.
8. Laboratory Orientation and Testing of Body Fluids and Tissues for Forensic Analysts. National Forensic Science Technology Center/Department of Justice. Online Training. 2007.
9. DNA Forensics, Profiling PCR and Beyond. Cambridge Healthtech Institute's 5th Anniversary Meeting, Washington, DC. 2002.
10. Microarray Methods and Analysis Workshop. Institute for Biosciences, Bioinformatics and Biotechnology, George Mason University, Manassas, VA. 1999.
11. New DNA Technology: Approaches to Toxicology, Medical Diagnostics, Analytical Chemistry and Agricultural Testing. Genetic Toxicology Association, Newark, DE. 1999.
12. Resolution and Interpretation of Mixtures. DNA Forensic Analysis: New Trends and Technologies. IBC's International Conference, Annapolis, MD. 1998.
13. PCR Qualification Strategies and Applications: New Developments of Real Time Detection. Perkin Elmer Applied Biosystems, National Institutes of Health, Bethesda, MD. 1998.
14. Advanced HPLC Detection for Analysis of Biomolecules. Millipore Corp., Waters Chromatography Division, Catonsville, MD. 1996.
15. Polymerase Chain Reaction (PCR) Applications/Cycle DNA Sequencing Workshop. American Type Tissue Collection, Rockville, MD. 1995.
16. Differential Display Polymerase Chain Reaction Workshop. EXON-INTRON, Inc., Columbia, MD. 1995.
17. Polymerase Chain Reaction Methodology Workshop. EXON-INTRON, Inc., Columbia, MD. 1993.
18. Sequence Specificity in Transcription and Translation Workshop. Cetus-UCLA Symposium. Steamboat Springs, CO. 1985.
19. Microscopy Training Course. Nikon Instrument Division, Garden City, NY. 1977.

## Professional Presentations

1. McClintock, J. T., and E. M. Dougherty. 1987. Cosmid cloning and restriction endonuclease mapping of the DNA of the nuclear polyhedrosis virus of *Lymantria dispar*, the gypsy moth. Abstract, VIIIth International Congress of Virology, Edmonton, Canada.
2. McClintock, J. T. 1985. DNA replication and protein synthesis during baculovirus replication. Abstract, Graduate Student Symposium, Washington Branch, American Society of Microbiology, Fairfax, VA.

## Grants, Honors and Awards

1. Travel Grant from the Agricultural Research Institute to attend the 91st Annual Meeting, Eastern Branch, Entomology Society America, Richmond, VA. \$400. 1991.
2. Travel Grant from the Agricultural Research Institute to attend the 91st Annual Meeting, American Society of Microbiology, Dallas, TX. \$1200. 1991.
3. Citizen Ambassador Program, Virology Delegation to the People's Republic of China. A program of People to People International. Spokane, WA. 1991.
4. Principal Investigator for grant funded by the National Institute of Allergy and Infectious Diseases of the National Institutes of Health entitled "Herpesviridae Infections and the Progression of AIDS." \$50,000. 1989.
5. Principal Investigator for grant funded by the National Eye Institute of the National Institutes of Health entitled "PDGF Expression in Proliferative Retinopathies." \$48,000. 1988.
6. Travel Grant from the American Society for Virology (sponsored by NIH) to attend the VIIIth International Congress of Virology, Edmonton, Canada. \$500. 1987.

## Additional Scientific Activities

1. Consultant and Expert Witness - Review and data analysis of DNA tests results (*e.g.*, RFLP analysis, PCR-based amplification and typing assays [*e.g.*, HLA DQA1/ PM, STRs, D1S80, and gender (amelogenin) identification] and DNA hybridization techniques (court qualified); and entomological interpretations of forensic samples (court qualified) collected at crime scenes. Provide prosecutors, defense attorneys, as well as law enforcement officials with a basic understanding of the science of DNA and a thorough background of the molecular techniques used in DNA analyses, courtroom strategies, and effective presentation of DNA evidence at trial.
2. Scientific Program Committee and Conference Organizing Committee for the Annual Conference on Antimicrobial Resistance, 2004 and 2003. National Foundation for Infectious Diseases, Bethesda, MD.
3. Reviewer for the National Research Initiative Competitive Grants Program. 2000. U.S. Department of Agriculture, Washington, DC.
4. Panelist of the U.S. Department of Agriculture Biotechnology Risk Assessment Research Grants Program. 2008, 2002, 2000, 1996, and 1995. U.S. Department of Agriculture, Agriculture Research Service, Washington, DC.

5. Reviewer for refereed scientific journals such as *Virus Research*, *Canadian Journal of Microbiology*, and *Journal of Agriculture and Food Chemistry*.
